

Anti-Ricochet Ballistic Tiles

Product Overview

- Enhances range safety
- Absorbs projectiles and fragments
- Protects from ricochet hazards
- Eliminates bullet fragmentation
- Reduces airborne lead
- Suitable for indoor and outdoor applications
- Quick and easy to install
- Size: Up to 1m x 1m
- Depth: 15mm / 43mm / 55mm
- Density: 900kg/m³
- Tensile Strength: 1.4 N/mm²
- Resistance: 80% Min B.S. 903/2A

Rosehill Defence's Anti-Ricochet Tiles enhance safety in live-fire settings across both commercial and governmental shooting ranges and shoot-houses.

Manufactured from recycled rubber and bound with polyurethane, they ensure both durability and flexibility and are engineered to prevent bullet fragmentation, reduce ricochet risks, and lower noise levels, while also significantly diminishing airborne lead exposure.

Developed with ballistic applications in mind, Anti-Ricochet Tiles are perfectly suited for reinforcing walls, ceilings, and floors.

Their versatility allows for installation in a variety of environments, including indoor and outdoor ranges, making them a trusted choice for law enforcement, military, security services, and private shooting clubs globally.
