

# Linatex® Rubber Target Backing

## Product Overview

- Exceptional strength and tear resistance
- Self-healing for minimal bullet hole visibility
- Reduces ricochet and airborne lead risks
- Lowers noise from shots and strikes
- Complies with stringent range safety standards
- Long-lasting, regardless of ammunition type
- Quick, free-hanging installation
- Aids target visibility with white backing option
- Enhances airflow in shooting environments

Linatex® premium rubber for target backing is a leader in shooting range safety and performance, renowned for its outstanding strength, resilience, and self-healing properties. As the globally preferred option for shooting facilities, it excels in a variety of settings from live-fire shooting houses to military and police ranges, and urban assault courses, offering unparalleled protection.

Its self-healing feature significantly extends both the longevity and safety of shooting environments, underpinning Linatex®'s role in enhancing shooting range standards.

A product of innovation, Linatex® merges advanced mechanical properties with a commitment to environmental sustainability, making it ideal for contemporary shooting ranges that prioritize safety, durability, and high performance. Additionally, Linatex® offers a white target backing variant, designed to improve target visibility, an advantage for camera-equipped ranges and training exercises where clarity is essential.
